Special Issue:

Quantitative Provenance Analysis of Sediments

Edited by: Gert Jan Weltje and Hilnar von Eynatten

Introduction

Quantitative provenance analysis of sediments: review and outlook
G.J. Weltje and H. von Eynatten 1

New tools

Evaluation of sediment provenance using magnetic mineral inclusions in clastic silicates: comparison with heavy mineral analysis
M.W. Hounslow and A.C. Morton. 13

Rutile geochemistry and its potential use in quantitative provenance studies
T. Zack, H. von Eynatten and A. Kronz 37

Statistical modeling

A quantitative approach to capturing the compositional variability of modern sands
G.J. Weltje 59

Statistical modelling of compositional trends in sediments
H. von Eynatten 79

Comparison of detrital zircon age distributions by kernel functional estimation
K.N. Sircombe and M.L. Hazelton 91

Size fractionation

Geochemical variability induced by entrainment sorting: quantified signals for provenance analysis
D. Garcia, C. Ravenne, B. Maréchal and J. Moutte 113

Grain size control of mineralogy and geochemistry in modern river sediment, New Guinea collision, Papua New Guinea
G.P. Whitmore, K.A.W. Crook and D.P. Johnson 129

Geochemistry of Jurassic to earliest Cretaceous deposits in the Nagato Basin, SW Japan: implication of factor analysis to sorting effects and provenance signatures
T. Ohta 159

doi:10.1016/S0037-0738(04)00282-9

Applications

The early stages of the Alpine collision: an image derived from the upper Eocene-lower Oligocene record in the Alps-Apennines junction area
B. Carrapa, A. Di Giulio and J. Wijbrans 181

Provenance of Pliocene sediments and paleoenvironmental changes in the southern North Sea region using Samarium-Neodymium (Sm/Nd) provenance ages and clay mineralogy
G. Kuhlmann, P.L. de Boer, R.B. Pedersen and T.E. Wong 205

Erosion in the Western Alps (Dora Baltea basin): 1. Quantifying sediment provenance
G. Vezzoli, E. Garzanti and S. Monguzzi 227

Erosion in the Western Alps (Dora Baltea Basin): 2. Quantifying sediment yield
G. Vezzoli 247

Sand composition in an Iberian passive-margin fluvial course: the Tajo River
E. Le Pera and J. Arribas 261
